

Postdoctoral position at the MIT Mineral Physics lab

The mineral physics lab at Massachusetts Institute of Technology invites applications for a postdoctoral position to study the physical properties and structures of crystalline and amorphous materials at high pressure and high temperature. Candidates should have a Ph.D in Earth Sciences, Physics, Chemistry or related field, and strong knowledge and experiences in: (1) vibrational spectroscopy, (2) synchrotron X-ray diffraction, and/or (3) synchrotron spectroscopy techniques in the diamond-anvil cell.

Information about the Mineral physics lab at MIT is available at:
<http://eaps.mit.edu/faculty/shim/index.html>

The initial appointment is for one year, but appointment is renewable each year. The position will be available beginning in February 2008 or as mutually acceptable. Review of applications will begin in September 2007 and the position will remain open until filled.

Applicants should send (1) CV with the list of publications, (2) a list of names, addresses and e-mail addresses of at least 3 references, and (3) summary of current and proposed research to:

Dr. Sang-Heon Dan Shim (sangshim@mit.edu)
