

Post doc position in the Chemistry Department at ASU

Available: from Feb. 1, 2007.

Duration: up to 2 years

Project:

Development of multi anvil techniques for high volume (up to 1 cm³), low pressure (6 GPa) assemblies (25/15, cubic module). Exploitation of these assemblies for high-pressure materials synthesis with fluxes.

Prerequisites:

Knowledge of high-pressure multi-anvil technique and crystallography, and interest in inorganic materials.

Please send an application with curriculum vita to:
